What should all pupils know having been to Akrotiri School? (SL and Teacher)

Year 2	-know how to create and debug simple programs -know that logical reasoning can predict the behaviour of simple programs	-write, test and debug simple programs -use logical reasoning (cause and effect) to predict the behaviour of simple programs	•
	-use technology purposefully to create, organise, store, manipulate and retrieve digital content	-explain why digital folders are used. Organise work into digital folders -place objects and pictures in a list or simple table -explain how a branching diagram or tree works -make a simple Y/N tree diagram to sort information -use a range of different digital media to communicate knowledge to others -create different artistic effects using digital media	
	-use technology safely and respectfully, keeping personal information private; identify where to go for help and support when they have concerns about content or contact on the internet or other online technologies.	-identify obviously false information in a variety of contexts -identify personal information that should be kept private -communicate safely, respecting and considering other people's feelings online -state who to tell if something concerns them online.	

Overarching Principles...Honesty Empathy Aspiration Respect Teamwork
